

## Technical Information

### ANTIOXIDANT

#### ADK STAB AO-40

This ADK STAB AO-40 is an effective non-discoloring stabilizing system that provides long-term heat stability by preventing thermo-oxidative degradation during processing and service life. It is suitable to applied in many polymers like ABS , polyolefin , rubbers or other plastics.

4,4'-Butylidenebis(3-methyl-6-t-butylphenol)

Molecular formula : C<sub>26</sub>H<sub>38</sub>O<sub>2</sub>

Molecular Weight : 383 g/mole

CAS. NO.: 85-60-9

Specifications: :

Appearance	White powder
Melting point °C	210 – 214
Heat loss %	0.5 MAX.
Ash %	0.1 MAX.
